Sportarena

Court Royal Arena stationary

This system fulfills the demands of a modern sports facility, which is geared towards a long-term use. In 5 m intervals the support posts, made of aluminium profiles, are set in concrete. Between the posts steel-hulled composite elements are mounted in a vibration-free way. The elements are extremely robust, weather-resistant, impact resistant and concurrently low-noise.

Court Royal Arena mobil

This sports facility aims at a long-term use. It is based on a free-standing construction, which is easy to assemble and disassemble. This extremely stable construction is perfect for undergrounds like schoolyards, grassfields or tartan surface, which should not be damaged by installation. The complete pitch bordering construction is equivalent to the design of Court Royal stationary and therefore is also extremely robust, weather-resistant, impact resistant and concurrently low-noise.

Court Royal Arena stationary

Technical details

- support posts, set in concrete in intervals of 5 m, to which composite elements are mounted in sandwich construction (element dimension: 5 x 1 m x 4 cm)
- stable fully-welded soccer goals made of aluminium oval profiles with big net hoop construction and access door. (goal dimensions: 5 x 2 m und 3 x 2 m)
- optionally with frontal and lengthwise net construction. Overall height 3m.
- expandable as volleyball and basketball playing field.
- the complete construction is safety tested.

Goals - Nets

Soccer Goal Court Royal Aluminium with net hoops

The newly developed Soccer Goals Court Royal, made from plain aluminium, oval profile 120 x 100 mm, are delivered in four parts and comply with its stability with the fully-welded aluminium goals. The two goalposts are fully-welded across the corner and are connected by a 6 m long bar with super stable interior profiles. The stable net retaining brackets are screwed to the goalposts as well as to the groove in the bar. The torsion-free special profile is fitted with a groove in which the provided net holders can be inserted. For additional charge of 7 % the goals can be delivered with an integrated net holder. The goals comply with the FIFA and DFB standards, are produced according to DIN EN 748 and are safety tested (GS-tested). Complete with ground sleeves, insert depth 400 mm.

The Court Royal Goals don't override the delivery dimension of 6 m. Dimensions: 7,32 x 2,44 m

No. 200103 aluminium plain

No. 200104 aluminium white

Soccer Goal Court Royal with free hanging net

The newly developed Soccer Goals Court Royal, made from plain aluminium, oval profile 120 x 100 mm, are delivered in four parts and comply with its stability with the fully-welded aluminium goals. The two goalposts are fully-welded across the corner and are connected by a 6 m long bar with super stable interior profiles. The stable tension posts, made of 30 mm aluminium tube include ground sleeves and tensioning ropes.

The torsion-free special profile is fitted with a groove in which the provided net holders can be inserted. For additional charge of 7 % the goals can be delivered with an integrated net holder. The goals comply with the FIFA and DFB standards, are produced according to DIN EN 748 and are safety tested (GS-tested). Complete with ground sleeves, insert depth 400 mm. The Court Royal Goals don't override the delivery dimension of 6 m.

Dimensions: 7,32 x 2,44 m

No. 200203 aluminium plain

No. 200204 aluminium white

Soccer Goal Base Frame, Aluminium, Tilttable

Additional device for No. 200103-4 and 200203-4. The tilttable base frame can be used, where lawn care should be made easier. Special protection of the nets. In general it should be used for natural grass courts.

No. 200701 net depth 1.50 m

No. 200702 net depth 2.00 m

Goals - Nets

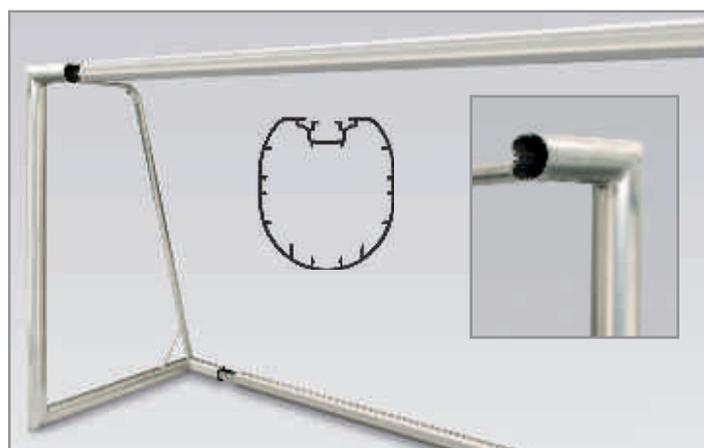

Soccer Goal Court Royal, free-standing, fully-welded, in four parts

The newly developed free standing Soccer Goals Court Royal are made of plain aluminium and are delivered in four parts and comply with its stability with the fully-welded aluminium goals. The goal frames and base frames are of 120 x 100 mm oval profiles. The two side elements are fully-welded and are connected by a 6 m long bar with super stable interior profiles. The torsion-free special profile is fitted with a groove in which the provided net holders can be inserted. For additional charge of 7 % the goals can be delivered with an integrated net holder. According to regulations an anti-tilt-resistant ground anchoring for grassy fields is included. Alternatively an anti-tilt-resistant ground anchoring for hard courts is available as well. The goals comply with the FIFA and DFB standards, are produced according to DIN EN 748 and are safety tested (GS-tested). The Court Royal Goals don't over-ride the delivery dimension of 6 m. Dimensions: 7,32 x 2,44 m

No. 200810 1,5 m width

No. 20082 2,0 m width

Soccer Goal SAFETY, free-standing, fully-welded

The SAFETY soccer goal is the perfect goal for soccer fields and artificial pitches. The free-standing goal is fully-welded in one piece. The goal frame is made of a 120 x 100 mm oval profile, the base frame is made of a 75 x 50 mm square profile with a weight tubing made of special profile, which has to be filled with silica sand on site. The welded on transportation wheels allow a simple and easy move of the goals. The torsion-free special profile is fitted with a groove in which the provided plastic net holders can be inserted. For additional charge of 7 % the goals can be delivered with an integrated net holder. The goals comply with the FIFA and DFB standards, are produced according to DIN EN 748 and are safety tested (GS-tested).

Dimensions: 7,32 x 2,44 m

No. 200832 2,0 m width

Soccer Goal free-standing, fully welded

The long-standing, freestanding soccer goals, made of plain aluminium, are fully-welded in one piece and are delivered with goal and base frame of 120 x 100 mm oval profiles. The torsion-free special profile is fitted with a groove in which the provided net holders can be inserted. For additional charge of 7 % the goals can be delivered with an integrated net holder. In compliance with the regulations an anti-tilt-resistant ground anchoring for grassy fields is included. Alternatively an anti-tilt-resistant ground anchoring for hard courts is available as well. The goals comply with the FIFA and DFB standards, are produced according to DIN EN 748 and are safety tested (GS-tested). Dimensions: 7,32 x 2,44 m

No. 200831 1,5 m width

No. 20083 2,0 m width

Goals - Nets

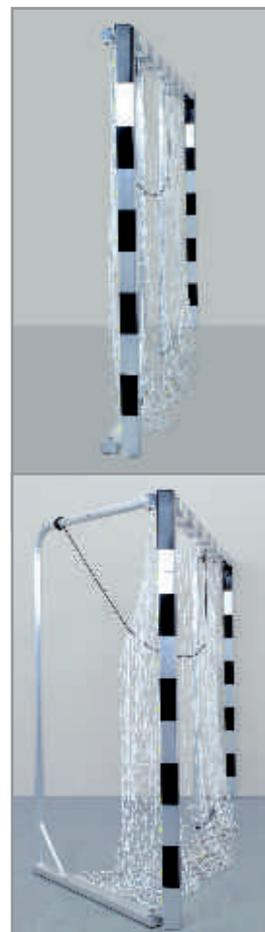

Youth Soccer Goal Court Royal 3 x 2 m, completely welded, in 4 parts

The newly developed Youth Soccer Goals Court Royal are delivered in four parts. Their stability comply with the fully welded aluminium-goals. The fully welded side frames are joined by 102 mm long round profile bars which are fitted with very sturdy interior profiles to join the parts together. Goalposts and bars are white-powder-coated. The warp-resistant profile is fitted with a particularly deep groove, in which the plastic net-holders are inserted. According to regulations a tilt-resistant ground anchoring for grassy fields is included. Alternatively anti-tilt weights for synthetic fields are available. The goal meets the FIFA and DFB standards and is produced according to DIN EN 748.

Dimensions: 3 x 2 m, Depth at base: 1,25 m

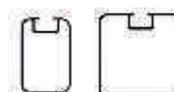

No. 202022

Handball Goal Court Royal

According to safety standard DIN-EN 749, goal frame 3 x 2 m welded, standard goal depth 1.25 m (optional 1.45 m). Made of especially thick-walled 80 x 80 mm aluminium profile with rounded edges, base pipe for screwing in, very sturdy rear construction base frame made of 75 x 50 mm square aluminium profile with guide groove, net hoop made of 50 x 3 mm round pipe for free net suspension (the net is not pulled over the hoops).

No. 20520

Goals - Nets

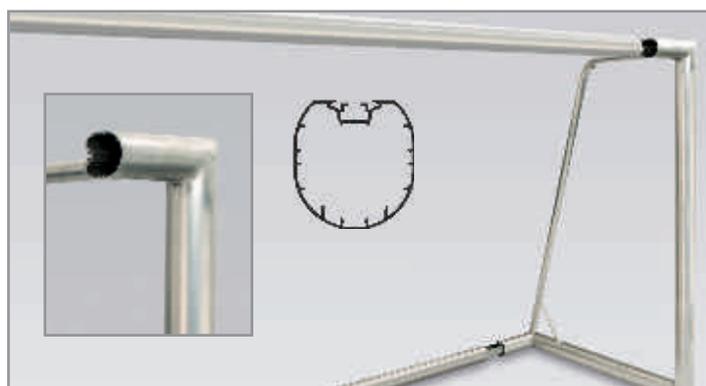

Youth Soccer Goal Court Royal, fully welded, in four parts

The newly developed free-standing Youth Soccer Goals Court Royal are made of plain aluminium and are delivered in four parts and comply with its stability with the fully-welded aluminium goals. The goal frames and base frames are of 120 x 100 mm oval profiles. The two side elements are fully-welded and are connected with the cross bar by super stable interior profiles. The torsion-free special profile is fitted with a groove in which the provided plastic net holders can be inserted. For additional charge of 7 % the goals can be delivered with an integrated net holder. According to regulations an anti-tilt-resistant ground anchoring for grassy fields is included. Alternatively an anti-tilt-resistant ground anchoring for hard courts is available as well. The goals comply with the FIFA and DFB standards, are produced according to DIN EN 748 and are safety tested (GS-tested).

Dimensions: 5 x 2m

No. 202021 1,5 m width

Youth Soccer Goal SAFETY, free-standing, fully-welded

The SAFETY soccer goal is the perfect goal for soccer fields and artificial pitches. The free-standing goal is fully-welded in one piece. The goal frame is made of a 120 x 100 mm oval profile, the base frame is made of a 75 x 50 mm square profile with a weight tubing made of special profile, which has to be filled with silica sand on site. No. 202041 1,5 m width

Goals - Nets

Net Holder I

For double-groove goals. Made of plastic, UV- and weather resistant. For quick net change.

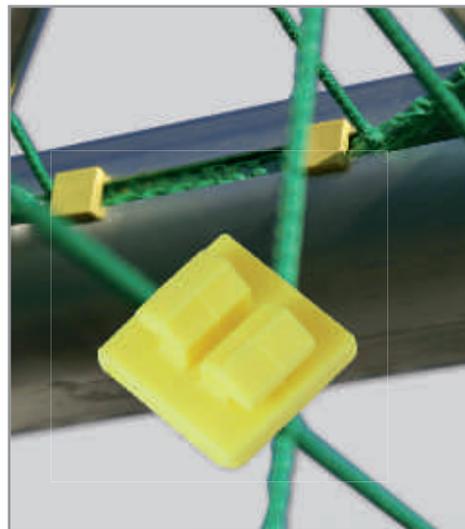

No. 20015

Net Holder II

For double-groove and single-groove goals. Made of plastic, UV- and weather resistant. For quick net change.

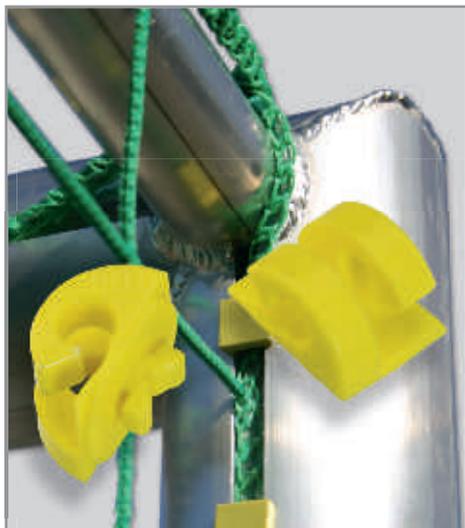

No. 20018

Net Holder III

For double-groove and single-groove goals. Made of plastic, UV- and weather resistant. With few net changes, theft proof.

No. 20019

Double Net Holder IV

For double-groove and single-groove goals. Made of plastic, UV- and weather resistant. With few net changes, theft protected.

No. 20016

Integral Net Fastener

Safe net suspension, no furling or inserting, even distance of the mount points. Particularly stable and regular fit of the net, no sliding out of the net. Particularly attractive design.

No. 200108 5% extra charge on the goal price

Anti-tilt locking

To secure free-standing goals on synthetic fields.

1 set = 2 weights for one soccer goal. The bins are to be filled with grit or quarry sand (not included). Weight (filled) approx. 160 kg.

Please indicate bar size.

No. 200805

Mobile Anti-tilt Locking

Suitable for the use of goals anywhere on artificial pitches. The weight is clamped across the goal's base frame. Welded transport wheel and big handle making it mobile. To be filled with sand. Empty weight 15 kg, filled 50 kg. 2 pieces per goal starting with a radius of 1.50 m. Meets DIN EN 748, safety-tested according to FIFA regulations.

Please indicate type of goal.

No. 200806

Goals - Nets

Recreation Ground Aluminium Goal

Fully-welded goal posts for small fields, natural aluminum, 80 x 80 mm, including aluminium ball trap. A structure that has particularly proven itself on playgrounds and football areas. Includes floor anchor for grassy areas, other anchoring available.

No. 20207

Rigid Goal Super, Aluminium

Fully welded aluminium oval profile, 3 x 2 m, including aluminium ball trap. Rear ball trap constructed from 4mm Ø tubes with square cross bars for additional strength. Includes anchoring for turf fields, other anchoring available.

No. 202071

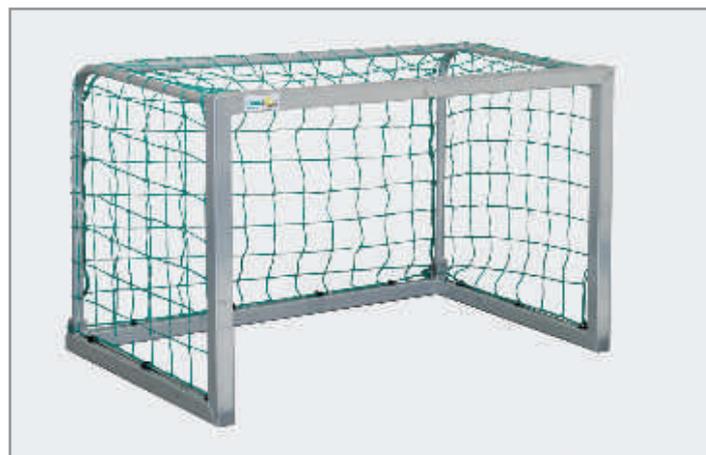

Rigid Goal with Basketball Add-On

Fully welded 3 x 2 m free-standing aluminium goal made of sturdy 80 x 80 mm profile, ideal for playgrounds and schools. Rear ball trap construction made of 40 mm Ø tubes. Four drill holes each to fix the ground anchors. Includes basketball kit with aluminium 120 x 90 cm backboard, anodized goal Big Duty and chain net. Includes anchoring for turf fields, other anchoring available.

No. 202075 Aluminium backboard

No. 202076 Steel grid board

Field Markings

Wet Marking Trolley Standard

Steel frame construction with weatherproof painted finish. Plastic container with approx. 9 liter capacity. Spraying mechanism on the back is operated with a hand lever. Line width adjustable from 50 mm to 120 mm. Three large balloon wheels. Height adjustable handles. Empty weight approx. 12 kg. Size 85 x 52 x 86 cm.

No. 20286

Wet Marking Trolley Universal

Steel frame construction with weatherproof painted finish. Steel container with approx. 10 liter capacity. Spraying mechanism on the front is operated with a hand lever. Line width adjustable from 50 mm to 120 mm. Four large balloon wheels. Height adjustable handles. Empty weight approx. 19 kg. Size 85 x 52 x 86 cm.

No. 20287

Wet Marking Trolley Akku 3000

Wet marking Trolley with a very strong pump, which automatically switches off by closing the spraying lever. The strong battery is operated by an on / off button at the guide rod and enables a very simple marking of at least 6 playing fields. The spraying device is positioned in the front, it is flexible in height and due to the shiftable top it can be adjusted easily over the whole frame width. The line width is adjustable as well. The trolley has got 2 plastic paint containers, each with a capacity of 13l (optionally 19 l). Each paint container has an own stopcock and is easily to remove in case of cleaning or emptying. The trolley has a stable steel pipe construction with weather-resistant powder coating. All components are bright galvanized. The 4 pneumatic tyres, 260 x 85 mm are ball bearing mounted and guarantee a smooth running. The guide rod is adjustable in height.

Weight: ca. 25 kg,
Dimensions: ca. 800 x 540 x 860 mm

Sand

To fill in between the bristles and for better hold.

Screw

Drives in easily, holds better in the ground and is quick to remove.

PliFix Leveling Aid

Season after season the PliFix stays in place and saves you from measuring each year. You need only mark out the measurements for soccer, rugby or field hockey pitches once. PliFix makes light work of repainting the lines. There is no need to walk from one end of the pitch to the other: just stretch a cord between two PliFix screws and then to the next one. Set contains 25 screws.

Soccer Target Shooting Wall WM

This freestanding construction can be dismantled into two parts. It is easy to transport and to store. To the stable frame construction of aluminium profiles a rear trailer is screwed on. In the frame construction are two holes each for the stationary mounting to the ground. For firm underground we recommend heavy-duty dowels and for grassy underground drop-in anchors should be used. For mobile use the rear extensions can be weighted with sandbags. The goal wall has the size of the ZDF – goal wall (Aktuelles Sportstudio). The weather-resistant front panel (divided in the middle) of 19 mm PVC rigid foam boards provides enough space for attractive sponsor advertisements.

Dimensions: (L x W x H) 270 x 188 x 127 cm

Hole dimensions: 60 cm

Transportation dimensions: (L x W x H) 135 x 188 x 15 cm

Weight: ca. 60 kg

Delivery without advertisement.

Movit - the universal blocking system

The practical, functional, safe, indestructible and light barrier system is made from recyclable polypropylene. It is available in the 6 standard colours: red, white, orange, yellow, green, blue. Other RAL-colours are deliverable on request. Movit is the ideal barrier system. It is fast to put together and it is stable and robust. Due to the low weight it is very easy to transport. In the middle of the barrier part an advertising space or a company logo is possible.

Fields of application:

- Construction site safety
- Sports events
- Concerts
- Street markets and celebrations
- Major events
- Pavement barriers
- Protection of devices
- Parking space barriers

Technical data:

- Length: 2 m
- Height: 1 m
- Weight: 12 kg
- Allowed load: 500 kg
- Temperature range: - 22°C to + 55°C
- Colours: red, white, orange, yellow, green, blue

No. 20700

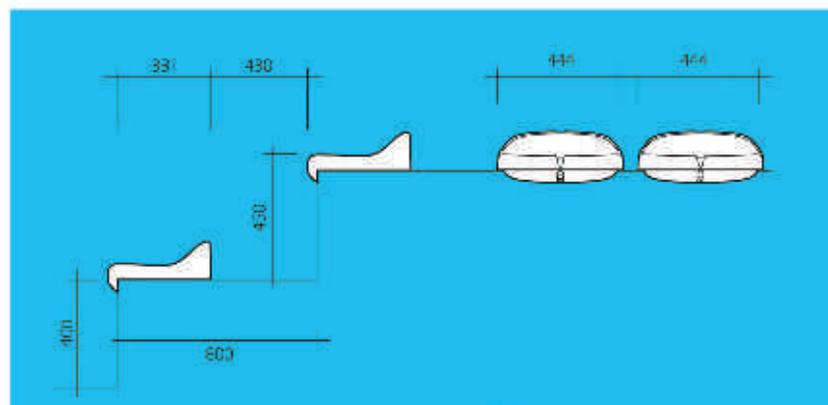

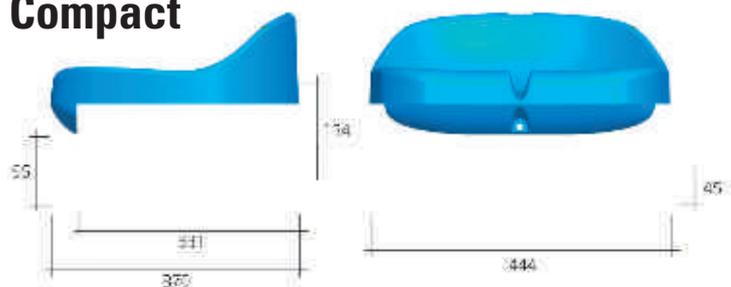

Characteristics:

- Easy to transport
- Fast and safe connection of the modules
- Environmentally-friendly, recyclable
- Height-adjustable
- Robust

This illustration shows the two types of tribune elements. The seat element with 16 seats on the right side as well as the stairway element with two seats on the left side can be combined in an arbitrary way. The standard version, however, offers the tribune with 50 seats.

Tribune Court Royal With 50 seats, three-rowed

The new Tribune Court Royal is suitable for all kind of outdoor sports. It is equipped with 50 comfortable three-rowed seats as well as a middle staircase and rails. The construction is of steel profile barrels and heavyweight grates as flooring. All steel parts are galvanized and absolutely weather-resistant. The UV-resistant plastic bucket seats offer sitting comfort and can be delivered in different colours.

The tribune is delivered in four modules, each 2 m wide and with 16 seats and additionally a staircase module, 1,5 m wide and with 2 seats for on-site mounting. The tribune complies with DIN 13200.

This tribune system with its 50 seats can randomly be built in series. Moreover customized designs with the 2 m modules as well as the staircase modules are arbitrarily possible. A solid ground should be provided.

Brush Starmaster for Synthetic Turf with Sand Infill

This is the ideal maintenance unit for synthetic turf with sand infill. The three-point suspension and the pulling rope are designed for use with a towing vehicle. The weight of approx. 80 kg has been chosen in such a manner that neither weighting nor hydraulic pressure are required. The brush harrow is used to prevent the growth of moss and grass on the turf surface. For careful maintenance of the surface we recommend our nylon towing mat. There is a choice of two models: The sturdy hot-dip galvanized steel frame with 3 rows of strong bristles which enable optimal maintenance. The triangular brush harrow is particularly suitable for uneven surfaces and sand holes. Ideal for filling in with sand maintenance of all synthetic turf surfaces with sand or rubber granulate infill.

Brush-Starmaster 1 250 x 80 cm, rectangular shape
No. 28000 for sand and granulate surfaces

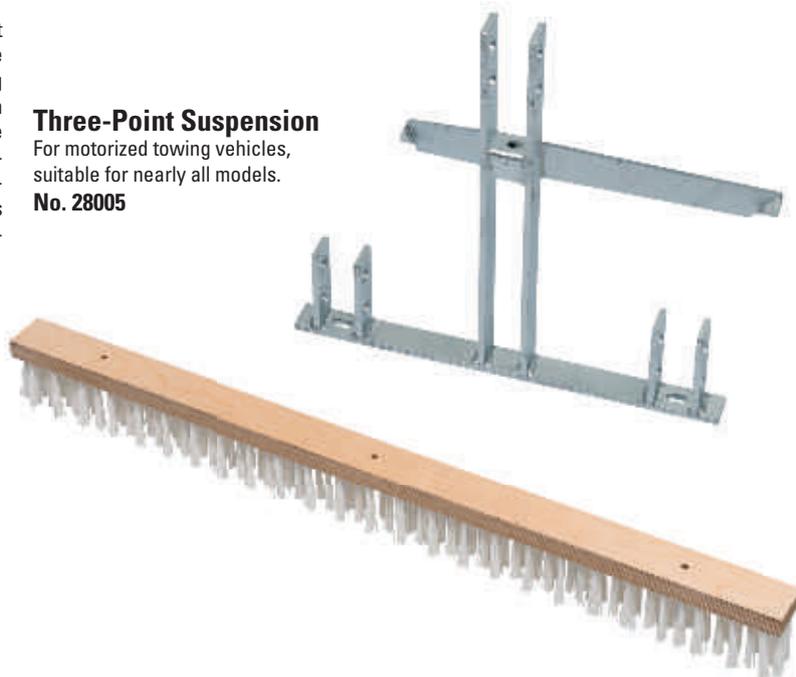

Brush-Starmaster 2 250 x 80 cm, triangular shape
No. 28002 for sand and granulate surfaces

Replacement Brushes 125 cm long
No. 28007 for sand and granulate surfaces

Three-Point Suspension

For motorized towing vehicles, suitable for nearly all models.

Systems - Nets

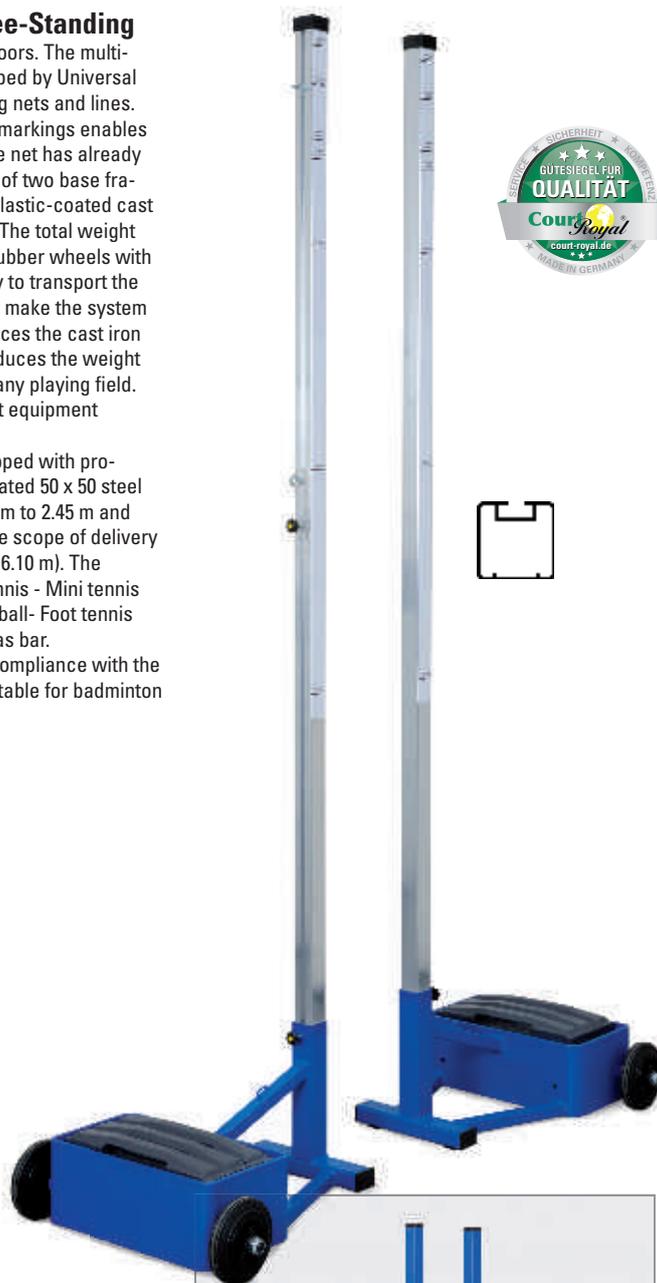

Universal Sport Posts Free-Standing

Can be used both outdoors and indoors. The multi-game system that has been developed by Universal Sport is suitable for games involving nets and lines. The easily legible scale with game markings enables easy height adjustments, even if the net has already been erected. The system consists of two base frames, each weighing 60 kg, and 12 plastic-coated cast iron weights, each weighing 10 kg. The total weight per stand is therefore 120 kg. The rubber wheels with mounted ball-bearings make it easy to transport the system and the weights. In order to make the system easier to transport on uneven surfaces the cast iron weights can be removed, which reduces the weight by 60 kg and allows you to access any playing field. This makes any additional transport equipment unnecessary.

The rear side of the system is equipped with protective rubber pads. The plastic-coated 50 x 50 steel columns can be adjusted from 1.55 m to 2.45 m and are equipped with a safety lock. The scope of delivery includes an all-purpose net (length 6.10 m). The following games can be played: Tennis - Mini tennis - Fistball - Volleyball - Beach volleyball - Foot tennis - Indiac - High jump with Zacharias bar. The system has been designed in compliance with the GBF guidelines and is therefore suitable for badminton tournaments.

No. 32001

Badminton Post Hobby

Movable free-standing system with rubber wheels on the weighted base. Posts made of 40 x 40 mm steel pipe. Complete with hooks and tensioning belt, painted blue. Weight per post approx. 25 kg, radius 60 cm

No. 30803

Badminton Post I

For competitions and school sports. Post made of 50 x 50 mm aluminium profiles. Complete with hooks, tensioning belt and ground sleeves.

No. 30802

Badminton Post II

No. 30840

Badminton Post Competition

Movable, free-standing system with rubber wheels and protective rubber pads. Posts made of 50 x 50 cm aluminium pipe complete with hooks and tensioning belt. Blue, hammertone-enameled. Other colors on request. Weight of each post approx. 70 kg. Rear extension 60 cm.

No. 30820

Additional Weight

Badminton Post Court Royal
Approx. 35 kg each for competition

No. 30825

Badminton Post Court Royal Tournament

According to DBV (German Badminton Federation) regulations. This system consists of two base frames, 60 kg each, as well as 12 plastic-coated cast iron weights, 10 kg each. This means a total weight of 120 kg for each post. The system has protective rubber pads. The 50 x 50 mm posts come complete with a tensioning belt. Solid rubber wheels mounted on ball-bearings enable easy transport with the weights. By taking off the weights and the posts the system can be easily stored and transported.

No. 30831

Cast Iron Weights

Approx. 10 kg, plastic-coated

No. 40498

Badminton Net Olympia

Made of 1.2 mm nylon line with tensioning steel wire, 6.60 m long. Size 6.02 m wide, 76 cm high, mesh size 18 mm, edged all round.

USP Motor Rollers

The new Universal Sport hydraulic rollers are characterized by their solid construction and good looks. Due to the use of serial components, the rollers are cost-effective, long-lasting and easy to maintain.

A special attention is paid on the work safety. Due to the suction-noise-insulation an easy rolling is possible. The rollers are equipped with an electronic, contactless ignition and an oil-warning control-system. All USP motor rollers are GS and TÜV proved.

Technical data:

Motor:	Honda GX 160, 4-stroke engine 4,0 kW at 3600 U/min.
Fuel:	Unleaded gasoline
Drive:	Maintenance-free hydraulic drive with automatic decompression, easy start.
Roller:	single-piece or split; width 900 mm, Ø 480 mm
Speed:	infinitely adjustable to approx. 6 km/h, forward and reverse
Working width:	900 mm
Weight:	empty ca. 390 kg; full ca. 510 kg
Dimensions:	length: 1750 mm; width: 990 mm; height: 1080 mm

No. 40330

Iso-Line

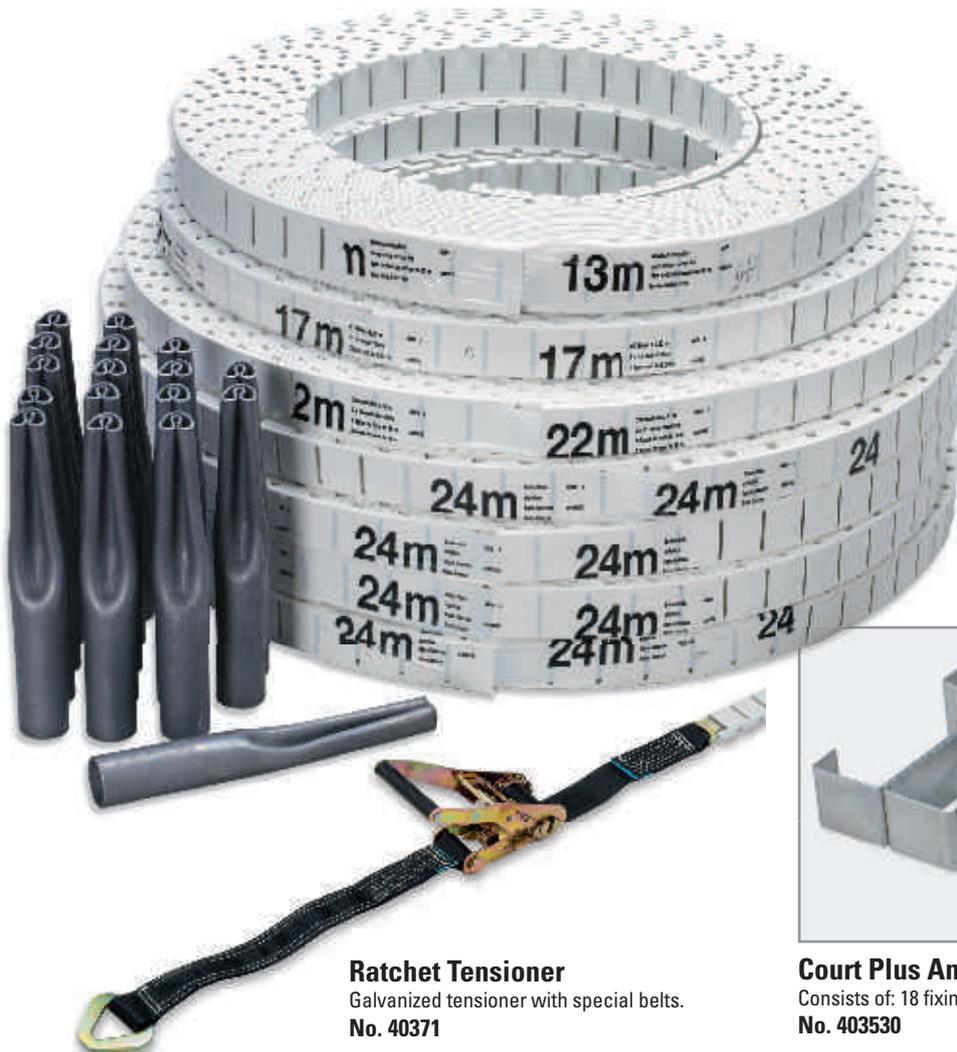

Anti-frost line covering. Protection against frost and other extreme weather conditions. Polyethylene 150 mm wide, 8 mm thick, set consists of three rolls, each 50 m. The tape should be weighted down with stones every 30 cm.

No. 40341

Court Accessories

Tennis Line Speziala / Court Plus

This tennis line has been developed especially for clay courts. Made of flexible, hard, grooved PVC. With 4 mm wide lateral slits, at 28 mm intervals. The lines for double courts are supplied in 6 rolls. Hard PVC and lateral slits allow the lines and court surface to interlock perfectly. The lines are anchored with 18 ground plugs per court, which are included with all line sets. The installation of the lines can be carried out by only 1 person. Please choose the lines with the appropriate anchoring set for your needs.

Ratchet Tensioner
Galvanized tensioner with special belts.
No. 40371

Drive-in Peg for Anchor Tube
Made of steel. In order to avoid damages while bashing the ground anchors, it is highly recommendable to use the drive-in-peg for anchor tubes.

Wooden Drag Net, Special Double

Two special PVC fabric nets 200 x 150 cm, with wooden rail. Suitable for clay and shale courts.

No. 41041

Important Information:

Our wooden drag nets are made from torsion-free red pine wood which is not comparable to any other hard wood. Red pine is characterized by its density and durability. This type of wood is often used in high-quality furniture and patios. More than 100.000 wooden drag nets have been produced by Universal Sport over recent years.

JOWO Tennis Caddy

The ideal partner for professional tennis trainers. Three height adjustment settings, simple and fast handling in transport. Can be folded for storage in a small space. Lockable cover. Sturdy, weatherproof structure. Capacity: 220 balls.

No. 42087

Training

Ball Basket Court Royal

The best-selling ball basket. Very sturdy, chrome-plated for collecting balls without bending over. Handle can also be used as stand. Locking cover, sturdy construction. Lock not included. Capacity: 70 balls.

No. 42080

Ball Pickup Tube Court Royal

Saves time and efforts picking up balls. Simply press this practical tube down onto the balls on the floor and it picks them up. Holds 17 balls. To empty the tube, just open the cover at the opposite end.

Length 120 cm, Weight: 0.8 kg

No. 42053

Ball Basket Professional

Sturdy wire basket with special plastic coating. To collect balls and for use as stand. Super locking mechanism. Very stable. Wheels for easy transport. Hinged cover to lock the basket. Ideal for everyday use. Capacity: 90 balls.

No. 42081

Plastic Ball Basket

Sturdy plastic ball basket with long handles that can be slid into both sides for use as a stand and for carrying the basket. Standing height 80 cm, Capacity approx. 80 balls., Weight: 1.9 kg.

No. 42073

BALLBASKET

HOLDS 80 BALLS

Want a better serve?
Ballport and practice is the answer.

BALLBASKET is made of tough, durable, recyclable polypropylene. Assembly is a snap. Slots snap together and screws are provided. Easy assembly instructions are in the box. No nuts or weld breaks as with wire ball pick-ups. Handles flip over so you don't have to bend to pick up balls or bend down to take them out of the basket. So unique that multiple patents were granted.

Sliding bars at top provide quick closure for easy transport.

Steel handle lock in place automatically as you turn the handle up. Now you pick up balls without bending. Just place your balls and press down. Balls roll in.

Locks lock automatically when you flip handles up.

Bars on the bottom flip up, you pick up balls. This makes ball pick-up even faster than forcing bars over balls one with other ball pick-ups.

Training

Tennisball Balls Unlimited Code black

A combination of natural rubber and woven English playnes felt. In our range of products this excellent tournament ball guarantees maximum performance and stability. Clearly less expensive than comparable brands. ITF approved tournament quality.

Training

Air-Tennis practice wall

The recently developed Air-Tennis tennis practice wall is the ideal training partner for everyone, from beginners to experts. This product is a unique and absolutely unbeatable piece of training equipment for use in stationary or transportable mode. It comes in a bag and is easy to transport. To set it up, simply unfold it on the ground and roll it out. Use the bellows (supplied), then fill it with air - it just takes seconds. You can use the air pressure gage, also supplied, to check that the air pressure is at the right level, as this also affects the way the ball bounces back. There are also attachment straps on both sides for attaching the practice wall to our pairs of stands, fences, or sports hall walls. The ground protection sheet, also supplied, is simply attached to the rear side of the wall with hook and loop fastener. You can also empty it in seconds, simply by turning over the bellows. Players can play on both sides of the Air-Tennis practice wall. It has lines marked on it at the height of the net to guide the player. Tested by international trainers who rated it very highly.

Accessories

The high-quality screen, proven and tested thousands of times worldwide

Heavy-duty polyethylene fabric, UV-stabilized, lets wind through. Full border with plastic-lined brass eyes every 50 cm, thus very resistant to tearing.

Wind Screen Super. The Quality Super weighs 160 g/qm is wind permeable and is available in the colours light- and dark green. It is the most sold wind screen. Only available in 12 x 2 m.

Wind Screen Exclusive. The quality of Wind Screen Exclusive weighs 140 g/qm and is extremely wind permeable and is excellently suited for printing, available in the colours light and dark green, yellow, white, blue, red and black. Standard size 12 x 2 m, but also available in length of 50 m and height of 4 m.

Printing. The print is rolled on by hand twice with special UV-resistant ink. This ensures good adhesion and a long life. Print is normally done in black, however other colors can be printed on special request. Any company logo as well as standard lettering can be printed. Please contact our graphics department for special designs with your own lettering and logos. You will be sent draft forms free of charge which we will revise and present as final artwork ready for printing. Please contact us for further details.

Spring Hooks

Galvanized, 60 hooks needed per 2 x 12 screen

Technical changes reserved. Pictures are partially illustrations.

Indoor Hall Covering

Top and sides with ring eyes, bottom weighted down with sewn-in lead tape.

Perimeter Banners

Available in special sizes up to 4 meters in height and 50 meters in length in 10 different colors, with ring eyes or border stitching. Printed colors RAL-compliant.

Showcase Type 41940 in Stand frame II

Details:

Keeping open system, safety lock, suspension system in stand frame, Stand Frame I

Information Board TMD 95

Suitable for outside and inside use, absolutely weatherproof design. Made of top grade, torsion-free aluminium sections, depth 95 mm. The surface is anodized in matt silver (E6-EV1). State-of-the-art manufacturing processes and advanced processing machines have been combined with technical know-how to provide a solid basis for this quality product.

Basic frame

Very robust aluminium base frame with inset steel back wall with corrosion-resistant coating.

Front frame

Aluminium front frame made of torsion-free multi-chamber aluminium sections with integrated weatherproof rubber seal and shatter-proof acrylic glass pane.

Front frame fitting

Special interlocking sections across the whole width so that no hinges are required; this provides greater stability.

Front frame opening

The front frame opens upwards and is held open by rods which engage automatically. The catch is released by lifting the front frame up again.

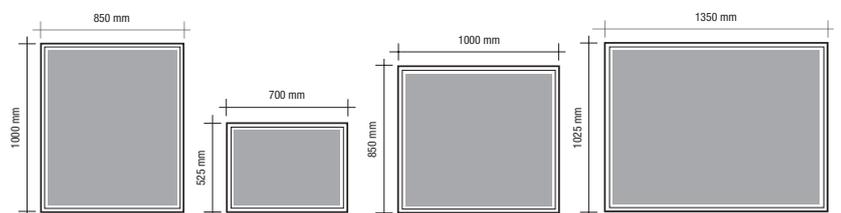

Safety lock

Safety lock located on the bottom edge with two keys. Simple and troublefree operation.

Wall fastening

The information board is fastened to the wall by means of two aluminium section rails; the board is then inserted into the rails and fixed by two screws at the bottom. All fastening elements are accommodated in the frame sections. It is not possible to dismount the information board when it is closed. This protects it very effectively from theft.

Showcase TMD 95					
Measuring					
Width x height x depth 95 mm	mm	700 x 525	1000 x 850	850 x 1000	1350 x 1025

Magnets					
Ø 30 mm, 10 per set	Art.-No.				41929

Accessories

GEROQUELL DRINKING FOUNTAIN

Always filtered, fresh spring water from the public drinking water supply for your sports club or your company.

- no more empty bottles
- no storage
- no more carrying of bottle crates
- high cost saving
- no problems with logistics

The GEROQUELL DRINKING FOUNTAIN has a stylish design and due to its easy-care GFK it is flexible for indoor and outdoor use. It is optionally available freestanding or with wall connection frame.

The GEROQUELL DRINKING FOUNTAIN provides fresh and tasty drinking water at any time, it makes the procurement and storage of bottled water superfluous, effectively protects the environment and it saves costs.

Inside is an activated carbon block filter of high quality, produced by the German manufacturer CARBONIT. This filter with its fine pores and channels is particularly suitable for the filtering of tap water. Reliably it removes possible chemical contamination like chlorine, lead, copper, drug residues, pesticide residues and microorganisms and thus improves the smell and taste of the water sustainably. The effectiveness of the filter is approved by renowned institutes and the (German) TÜV. Dissolved minerals are preserved and the water is perfectly safe to drink. A timely filter replacement should be noted.

The GEROQUELL DRINKING FOUNTAIN is delivered in standard version in white. The delivery scope contains: high-grade valve, flat perforated waste, water filter (filter housing and filter cartridge), water meter and lockable inspection door. Condition for the installation is a suitable connection for fresh and waste water.

Technical properties for the filter CARBONIT IFP PURO:

Water flow*: max. 7 l / min.
Capacity: 5.000 l = ca. 28 l / per day
Filter change: after 5.000 l flow or at the latest after 6 months
Operating pressure: max. 6 bar
Operating temperature: 5° - 40°

*) Approximate water flow of a new filter element per minute about 4 bar line pressure.

GEROQUELL DRINKING FOUNTAIN
